HYVEE AIRCRAFT TRANSPORT/RECOVERY TRAILERS

HyVee's Combination UH-60/AH-64 Aircraft Transport/Recovery Trailer loads, transports, and unloads a Blackhawk or an Apache from ground level. The HATT lowers, raises and rotates hydraulically on its own power thereby eliminating the need for crane or aerial lifting of airframes. Air ride suspension protects sensitive avionics while in transport. Gentle variable speed hydraulic power is employed to load aircraft utilizing a custom loading carriage and adjustable tow bar assembly. The HATT crabbing feature allows for 360° rotation for easy alignment. Designed for versatility, the UH-60/AH-64 HATT also features adjustable ride height, on-board diesel engine, on-board auxiliary air compressor, auxiliary tool boxes, aluminum loading ramps, and work lights. UH-60/AH-64 HATT is additionally equipped with an electric winch for emergency use.

Ground Recovery Reduces Damage Loading/ unloading aircraft from the ground reduces damage to airframes due to aerial recovery, crane lifting, or ground wheel transport.

Ground Recovery Reduces Manpower and Equipment Requirements Recovery requires one HATT and one vehicle. No additional flatbed for crane. No additional aircraft. No special tools.

Ground Recovery Enhances Safety and Reduces Risk Recovering a downed aircraft in minutes versus hours reduces warfighter exposure. The HATT eliminates unnecessary aerial recoveries, complex sling-loads, and specialized rig/lift cranes. Off-road recoveries are routinely accomplished at Ft. Rucker, AL utilizing this equipment.

ALL AIRCRAFT MODELS AVAILABLE. CUSTOM MODELS AVAILABLE INCLUDING MULTI-AIRCRAFT USAGE. SKIDDED OR WHEELED AIRCRAFT, UAVS. OPTIONS AVAILABLE BLADE RACKS, LASER ALIGNMENT GUIDES... JUST ASK.

HyVee can provide the full spectrum of logistics support necessary to sustain the equipment including Training, Repair and Replacement Parts, Technical Support, Publications, and RESET for all products. We ship Spare and Repair Parts on short notice which reduces the user logistics tail and inventory costs.

SAFE for personnel: **Radically Reduces Requirements** of manpower, equipment, and time to safely load operable or inoperable aircraft.

SAFE loading/unloading of airframes: Proven to reduce airframe damage incurred during aerial recoveries or crane-lifting onto flatbed.

SAFE travel: UH-60/AH-64 HATT is hauled by Tandem Axle Road Tractor with wet kit, Class 8 Commercial or 5-ton Military. Air-ride enables safe transport at highway speeds or on unimproved surfaces

HyVee's satisfied customers include Ft. Rucker Army Aviation, 101st ABN DIV, 82nd ABN DIV, 4th CAV, 25th ID, Army Fleet Support, L-3 Communications, DynCorp and Ft. Eustis, AATD.
